V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-10	YES
	Claims		NO
Inventive step (IS)	Claims	1-10	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-10	YES
	Claims		NO

2. Citations and explanations

1. Reference is made to the following documents:

D1: DE 200 12 639 U

D2: DE 202 04 917 U

2. Document D1 is considered the prior art closest to the subject matter of the claim. It discloses a frame as per the preamble of claim 1.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

The problem addressed by the present invention can therefore be considered that of improving the reliability of the connection between the cross struts.

The solution to this problem proposed in claim 1 of the present application involves an inventive step for the following reasons (PCT Article 33(3)): The available prior art does not describe the use of pipe clamps for this purpose. A pipe clamp is known from D2, but it is used for adjusting the length of a rod-like device. The connection of two pivotable

struts is not treated.

3. Claims 2 to 10 are dependent on claim 1 and therefore likewise meet the PCT novelty and inventive step requirements.
